

Loss of Control - A Pilot's Nemesis

During the past year most GA accidents have been caused by loss of control. This can be anywhere in the traffic pattern, on landing, on take-off, or during cruise flight. For some unknown reason pilots tend to forget the basic fundamentals of flight, or maybe they never learned the basics of aerodynamics? Videos, recent accident reviews and discussion will provide each pilot with some tidbit of knowledge for their future use in flight.

Directions: From I-90 take the Sprague Avenue Exit. Go west to Fancher Avenue and go north. Turn right on Rutter Avenue. The EAA Hangar is on your left.

A message from the National FAASTeam Manager

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
